Environmental Policy

Moughton Engineering Limited recognises the impacts that its operations, activities and waste production have on the local and general environment. It maintains a commitment to minimise the adverse effects of those impacts through the implementation and continual improvement of an environmental management system.

The Company's environmental management system will ensure compliance with environmental legislation and the prevention of pollution through appropriate risk control consistent with maintaining an exceptional service to its customers.

Moughton Engineering Limited is therefore committed to the following key policy principles:

Undertaking a full review at Senior Management level of the Strengths, Weaknesses, Opportunities and Threats (SWOT) posed to the Companies undertakings.

Using the information gained to set out aims and objectives for the Company in relation to the environment, health & safety and quality. These ensure that the Company mitigates against legislation requirements and also ensure the Company has systems and documented information in place to enable it to maintain and continually evolve and secure its future in an every changing market place.

To achieve this there is consideration and integration of the environmental concerns and impacts into all of the Companies decision making and activities.

The Company recognises that the minimum acceptable level of environmental performance is that set out in current environmental legislation and ensures it works to and where possible exceeds these levels.

The Company by setting clear environmental objectives will ensure it regularly monitoring progress against them.

The Company will do all it can to minimise the generation of waste and by doing so reduce its environmental impact through responsible disposal and recycling options.

The Company will minimise the use and emission to the environment of any hazardous materials used in the Company's processes and activities and will endeavour to source non-hazardous alternatives where commercially viable.

The Company will purchase recycled, recyclable and environmentally responsible products where these are available, economical and suitable.

The Company will develop working partnerships with suppliers and customers to establish environmental standards and meet required environmental expectations.

The Company will promote environmental awareness among its employees including training staff about environmental issues that affect their work and their responsibilities in maintaining good environmental management.

The Company will communicate this Environmental Policy and commitments to all staff, suppliers, customers and other interested parties.
